Subject: Oppose Costly Cap-and-Trade in SB 1530
Date: Monday, January 27, 2020 9:00:07 PM

Dear Chair Dembrow,

I see this as just another wasted money tax your putting on to the people that you are here to represent. I don't see what this is going to accomplish but to hire more public employees to calculate the amount of money they want to take from me for a tax that is going to support what. government employee retirement. surly you aren't going to create a better fuel with the money. this is just another tax that will take another \$3800 from me that I cant recoup from my business sales. If you haven't realized we are now in a global market and the other countries I compete against don't have this tax.

My Farm uses by far more carbon than I create. so why do you want to tax me for utilizing your waste. you should be paying me not taxing me.

Sincerely,

Kevin Duyck
