---

Oregon Legislators:

As you grapple with the defining crisis of our era, I urge you to be bold. Take strong action on climate. It is long overdue, and the longer you delay, the worse our crisis will become. Conversely, acting quickly and with boldness will minimize the costs and dangers of the climate crisis and free up enormous energy and capital, which can be put to good use in building a strong, resilient economy.

Please put a price on carbon. Take bold action on climate.

Thank you, and best regards,

Andy
