---

Hello Oregon Legislature!

I support strong climate legislation for Oregon's future. As a parent and grandparent, I am worried about the increasing dangers of climate change for future generations. What kind of world will my grandchildren inherit? A world that continues the slide towards ever greater environmental disaster, or one that effectively addresses climate change? Similar to Oregon's pioneering leadership for public beach access and the bottle bill, we need vision plus real action on climate change and transitioning to a sustainable economy.

Thank You,

- James C Meyer
