Aloha!

My name is Keiley Rock and I am a student at University of Hawai'i at Manoa. I would like to testify that we need stronger laws that don't give free passes to our largest polluters. Climate change is a subject that can no longer be ignored and it is time that our legislature reflects sustainable initiatives! Stop investing in corporations that inflict environmental harm and force these companies to pay for the negative externalities that are currently being generalized to THE PEOPLE. Just a reminder that the government works for THE PEOPLE not for corporations.

Mahalo,

Keiley Rock
