**Subject:** I support a stronger version of HB1530

**Categories:** Taylor

To Senator Knopp,

I support the HB1530 Clean Energy Jobs Bill and I want to advocate for a stronger bill, folding in provisions from the Clean Energy Jobs Bill from 2019. I want you to show up for the vote to establish quorum and vote YES on the Bill. As this bill goes through the legislative process, I want the following standards to be met:

- Place a limit or 'cap' on climate pollution that limits Oregon's share of climate pollution based on the best available science.
- Make it so that all sectors reduce pollution and pay their fair share when they pollute above the cap.
- Reinvest the proceeds into the communities that need them most to help transition to clean energy and prepare for a changing climate.
- Give workers and rural communities the transition and retraining support they need by expanding access to apprenticeship and training programs.

I hope you will do the right thing and help make changes now that will save our climate and beautiful state for future generations.

Thank you,  
Laurie Harrer
