**Categories:** Taylor

Hello,

I am an Oregon resident as of 2019. I came from California, and now realize that there were many things that I assumed about fellow west coast states. Now living in Eugene and trying to learn about all that is current regarding Oregon, I am writing to express my support of SB1530 (LC 19).

Statewide emission caps are needed. Without these and a response framework for tons of gas emitted, we will create unhealthy living conditions. Something that is new for me, coming from California, is all of these "unsafe air quality" alerts I have been getting since moving to Oregon. Without emission caps this problem can become worse.

Thank you,

Natalie Dybens
