Subject: No on SB 1530 Climate legislation

We are family farmers and know we are farming sustainable, creating/growing crops to benefit our environment.

1. We are NOT in a climate crisis we are in a Forest mis-management crisis.
2. SB1530 needs to Die. It's framework is JUNK.
3. Logging is GREEN and CLEAN. PLUS it already provides family wage jobs it's called FOREST MANAGEMENT.
4. Oregon's young people need to get to work in the woods and breathe some clean fresh air. Hard work never killed nobody.
5. Oregon's most vulnerable, need their parents to be able to pay for a roof over their head and show them good work ethics and how to be stewards of the land.
6. Rural Oregonians ARE on the front lines and we are doing a damn fine job, DON'T IGNORE OUR VOICES!!

CARBON EMISSIONS IS NOT OREGON'S PROBLEM - we are in the TOP 5 of lowest carbon emitting states per capita in the nation.
