---

Hi there. My name is Travis Pruitt. I am a 5th generation Oregonian. My family are pioneers of this state and have owned hundreds of acres in Oregon. I will be the first to say that this climate bill will devastate our state. We are not California. We are a very unique people in Oregon. We care about our environment more than anyone in my travels. We tend our lands and we help our neighbors with theirs if they need help. The issue with our forests is too many regulations and not enough management. Selling tax credits will not change anything. Allowing Oregonians to manage their forests is what is needed. More logging. More thinning. More cleaning the forest floors. I, and thousands of others, know what will happen if this tax gets shoved down the people's throats. It will devastate our predominantly rural state. The only environmental issue in this state, is the drugs and filth in the urban centers. We all implore you to take care of the real problem in Oregon. Not one that will bring in tax revenue for an agenda. Thank you.
