

To those in the Oregon Legislature regarding the Corona Virus:

This is ridiculous. The flu is nothing but the poisoning of our air, water and food with glyphosate, aluminum, pesticides and the vaccines with their horrendous ingredients are all PROVENLY destroying our immune system which allows us to be vulnerable to such simply viruses. It is well known that no plagues existed until we got on grains back some 12,000 years ago. Then we slowly adapted and then electricity that weakened the body also made us vulnerable. Go after the real causes and stop this medical monopoly take down of our economic system and our health. Stop the lies and fraud on the America public. Stop the shutdown.
