

To whom it may concern:

In the wake of Covid-19 and the effect it's having on tenants not being able to pay their rent- Not only will I not be able to pay my mortgages, but i also WILL NOT BE ABLE TO KEEP THE ELECTRICITY, GAS AND WATER ON for my tenants.

My meager savings will not be able to get us through this crisis.

My husband and I are both self employed- full time and are both being negatively impacted by this virus.

And at this time it is my understanding that we do not qualify for unemployment benefits.

I am genuinely losing sleep over how I'm going to keep my own children fed & housed, as well as my tenants, when all our streams of income are drying up and savings are running out.

Call to action:

- relief for landlords from mortgage and utility payments
- unemployment benefits for self employed
- increase unemployment benefits for employees

Thank you for your consideration.
