

My husband is an ICU doctor. I am very worried about him and his coworkers getting sick and about them having to ration supplies. I am also very worried about him bringing the virus home to my children and me. There are many hotels surrounding Kaiser on Sunnyside. Could we work to set up places for these healthcare workers to stay or live during the pandemic in order to protect their families (we have an imperfect plan to isolate him at home, but not everyone has that luxury)? Can we ask the public (especially those that hoarded) to donate masks and gloves?

Thank you,
Blair Wardwell
