

To Whom it may Concern,

I am fortunate to be an educator, as I currently understand it whose income and benefits are protected by my contract with the district during these uncertain times. However, I work with a wonderful contracted staff who are essential to the success of our students and are not protected.

With the rapidly changing news regarding our economy in Oregon, I worry for all of the people who now face an unimagined uncertainty to how they are going to support themselves and their families. My hope is that legislation is already in the works to stimulate the economy and provide relief for hard working Oregonians who are involuntarily "furloughed" from our school districts and not covered by a union contract.

I appreciate your efforts and empathize with the difficult decisions that you as leaders are faced with.

Best Regards,

Fanny Bretsch
