

I am a single mother of a 14 year old and a contract architect. I am scared that work will dry up and I will not be able to pay my bills through this pandemic. I don't know how we're going to survive through this. I can't just file for unemployment insurance. Gig and contract workers need unemployment too! I have a \$7k deductible and pay \$300 a month already to healthcare. How am I supposed to afford life if I get the corona virus? Small businesses need help that is NOT a loan. I've spent my entire life NOT racking debt and now that's my only bailout option? Honestly I don't think that is even an option for me. We need mortgage, rent and utility payments HALTED. How are we supposed to pay back rent back once the virus has "run it's course"? I am very scared and can't even focus on the work I do have right now. Please so something for me and my family that is not a LOAN. I need help. I can't afford a loan.

Melissa Moline.
