

Hello elected leaders,

My wife and I Bend Electric Bikes. We are a small business for 12 years now. The current offerings of a loan is not going to get us through. I would propose a grant type of approach so that we may weather this storm.

I have begun asking all of our partners to help where they can and I have no bigger partner than this wonderful state that I have called home for 32 years.

When the good things do come out of this, I hope it's leaderships direction toward a more sustainable and more equitable sharing of our resources.

Regards,

Sterling
