

My advise to the special committee is to :

- 1) Measure the cases. We need to know who has the virus. Barriers to testing need to be removed.
- 2) Communicate the facts to the various state and local agencies you interact with.
- 3) Coordinate feedback and suggest improvements based on #2.

There is an extraordinary opportunity to expend resources in the wrong areas and waste time and resources because of miscommunication.

Best of Luck.

Tim Thigpen
