

To whom it may concern:

Please consider a grant to all the small businesses during COVID19. While our employees can seek unemployment, we cannot. The long term detriment of all these organizations suffering through this time without the support of the government will lead to many shutting their doors for good, our staff on unemployment for longer, and ourselves quickly winding up in the same position.

The recovery will be much more taxing and more painful both financially and as a community than if we halt the problem in its tracks by giving some relief. A loan will not fix this problem.

Please hear the needs of our state and help those who help the economy most.

Sincerely,

Jacy Mairs
