Every American that usually lives paycheck to paycheck is worried about the same thing: rents/mortgages. Like in Australia, we need to disallow the banks to charge mortgages to any business or home owned or rented by any member of an industry shut down by the government for this i.e. food and beverage, hotels, hairdressers etc. we need these businesses to exist so we can all go back to work when this is all over. I'm a bartender and fear for the future for myself, my friends, and one of the industries most responsible for Portland being the vibrant city it is.

Thanks,
