

I am a small business owner in the wedding industry, a wedding planner. Many couples have cancelled, postponed, or are changing their plans for their 2020 weddings, but there are a lot of couples looking to legally marry by eloping ASAP.

Washington County has their marriage certificate by mail services still in operation but many offices have closed all services. We're trying to help anyone affected - not our clients just general citizens. Some are people who want to keep their date just minus the wedding, they'll celebrate later. Others want to be married ASAP for financial, and other personal reasons.

You can get a marriage certificate from any county but we want to discourage people from driving around the state in a scramble. Also are there any emergency resources we can enact such as a few justices of the peace who could marry people over zoom, skype, etc? To avoid physical gatherings?

Direction would be helpful.
