

In the Czech Republic everyone is required to cover their face in public. Scarves, bandanas, face masks. I saw a video of a barefaced young man removed from public transportation.

They are about twice as large as Oregon with 925 positive tests, 13,704 tested and zero deaths.

Volunteers have made cloth masks. There are patterns online.

Is this something we need to do or has the crisis in personal protective equipment for health care workers been resolved?

Thank you for considering these issues.
