

There is a lot of financial resources being paid by the government. That money paid to the people is to assure their finances are disrupted as little as possible.

The tenants should use the relief package to stay current with their rent. Some tenants understand their responsibility, others will take advantage of the “free money” and will not use it for the intended purpose.

Although I am sympathetic of the struggles ahead, I know the money is available and the rent should be paid.

If you would like specific information regarding the relief package, please contact me directly.
