

To whom it may concern;

Please consider a situation where the landlord can no longer pay their water, sewer and garbage bill. The tenant could be left with an invisible corona virus film on themselves and their walls with an inability to clean it from their hands, faces and walls due to lack of water and then the hantavirus re-emerges due to the piled up garbage and mice. The EMT's would face a terrible, unhealthy disease-ridden environment when they arrive. Please also consider that many landlords rely on their rental income as a way to feed themselves as well as pay their own bills at home.

Thank you for your consideration,

Greg M.Lorenzen
