

Good Morning to All...

Just wanted to express how this will impact our business.

We are a family owned and operated business of a 20 unit apt complex. My father owns them he is 82 yrs old. I manage them I am 57 yrs old and my son 37 yrs old and he does the maintainance. We all rely on the income of our complex. Three families will be effected. I realize there are 20 other families as well. Some tenants I believe may be able to pay rent for a couple months and others will not be able to at all and others will work the system to get every kind of help the can.

This income we have is the only income we have except for Dads social security. To suspend tenants paying rent would devastate us if it went on for more than 2 months. Maybe we can all live on half of our income. This shutdown is something we (everybody) have never even thought of. I don't know the answer for sure. But I do know landlords work hard to keep their tenants happy, safe and secure. We deserve the same. Landlords need help!!!

Thank you for listening...Be healthy!
