

To Whom It May Concern:

Not every landlord has multiple properties, although I think that's the impression of lawmakers. I own one rental and because of recent events, my work paychecks just went to basically \$0. I am personally trying to bridge this gap for my family and cannot afford to be paying my home mortgage and my rental's mortgage because my tenants get to defer or skip payments. I am all for helping my tenants out if/when times get tough and they can't make a rent payment, but I don't think it should be my responsibility 100%. There needs to be relief for both parties.

Thank you,

Rob
