

Hello!

I have seen few mentions about the possibility of delaying filing OR state tax returns, normally due in mid-April.

It would make sense for Oregon to delay tax filings, because the state tax forms require data transferred directly from the federal forms, which are now not due until mid-July.

Please consider this - otherwise, Oregon taxpayers will have to fill out their IRS forms by mid-April, even though they are not due until mid-July, in order to know what they should pay to or get refunded from the state of Oregon.

Thank you!
