

Q. Could you verify the period covered by the \$1.5 Billion in Unemployment insurance payments made to date. Calendar year, federal fiscal year, or state fiscal year?

Q. Dividing the \$1.5 billion by 245,000 individuals indicates benefits paid to date per individual claimant averaged \$6,155 . IF that were broken out by weekly benefit amount how much would that be?

Q. The state revenue forecast projects \$7 billion in UI will be paid to Oregonians this biennium. With the reported \$1.5 billion in benefits paid to date, are we on track with the forecasted \$7 billion amount for the biennium?

Thanks,  
Tom Cusack
