

My biggest question & concern is not even for the right now we're all in. If there's a second wave of coronavirus to shut down the nations economy again, what are you doing to ensure that 11 weeks into closing, were not waiting for financial assistance you promised us? 11 weeks and ZERO INCOME!!!! Inhumane to make so many suffer, struggle which bills to pay, keep a roof over our families heads & food available when the government required us not to work. My right to provide for myself & my family is now criminal & punishable when I can earn my living & way through life just fine. But now I can't? You promised help. Where is it now? But what are you doing to make sure this NEVER happens again?
