

To Those Who Are Concerned!!

Regarding LC 52: our daughter, who is 37 years old, IDD, profoundly deaf and wheelchair dependent recently had a hospital stay because of pneumonia. Because Kaiser Sunnyside allowed her caregivers to be with her the entire stay the medical staff and our daughter had a positive experience. The trauma of not being understood and medical decisions that would not meet her needs was averted. It was a good partnership. The dignity of care and informed, personal choice is critical to this diverse and special population. Please protect their rights.

Thank you,
Jim and Marsha Kitchen
