

I live in district 13, just outside of Sherwood. I am writing to express support for the introduction and passage of Legislative Concept 52 during the current Special Session. The bill will go a long way toward ensuring that people with disabilities can access healthcare in Oregon and that they can get support from people they trust when they are in the hospital and/or having end-of-life discussions. This is what any of us would want if we were disabled.

Thank you.
