Subject: VOTE NO on cell phone tax
Date: Monday, June 22, 2020 6:31:05 PM

Please do the right thing when considering this tax. To put a tax on cell phones will hurt the people who need this the most and are least able to afford it. Besides, the federal government has already authorized more than \$60M of broadband funds to help provide service to rural areas. Where has that money gone? Is it going to be wasted like the \$80M designated for replacement of the Employment office computer system that didn't happen? I'm asking you to do the right thing! Vote NO!
