

Senators and Representatives,

I urge you to consider and pass Legislative Concept 52 (LC52) in the upcoming special session. The Covid-19 crisis has highlighted the continuing problem of disability discrimination in healthcare. You can help solve this problem by adopting LC52.

LC52 will ensure that Oregonians experiencing disability can access healthcare, have support from people they trust while hospitalized and have support when making critical healthcare decisions.

Our rights as Oregonians to be free from all kinds of invidious discrimination - including disability discrimination - can only be preserved through your good work in the Legislature. With that in mind, I urge you to consider and adopt LC52.

Please include this email as written public testimony.

Thank you for your work on behalf of Oregonians,

Kevin Campbell

Resident of

Oregon Senate District 18

Oregon House District 36
