

# Interstate Bridge Replacement Program *Vision and Values*

July 16, 2020

**Brendan Finn**  
Director, Urban Mobility Office

**Washington State  
Department of Transportation**

**Carley Francis**  
Regional Administrator

# What is a Vision and Values Statement?

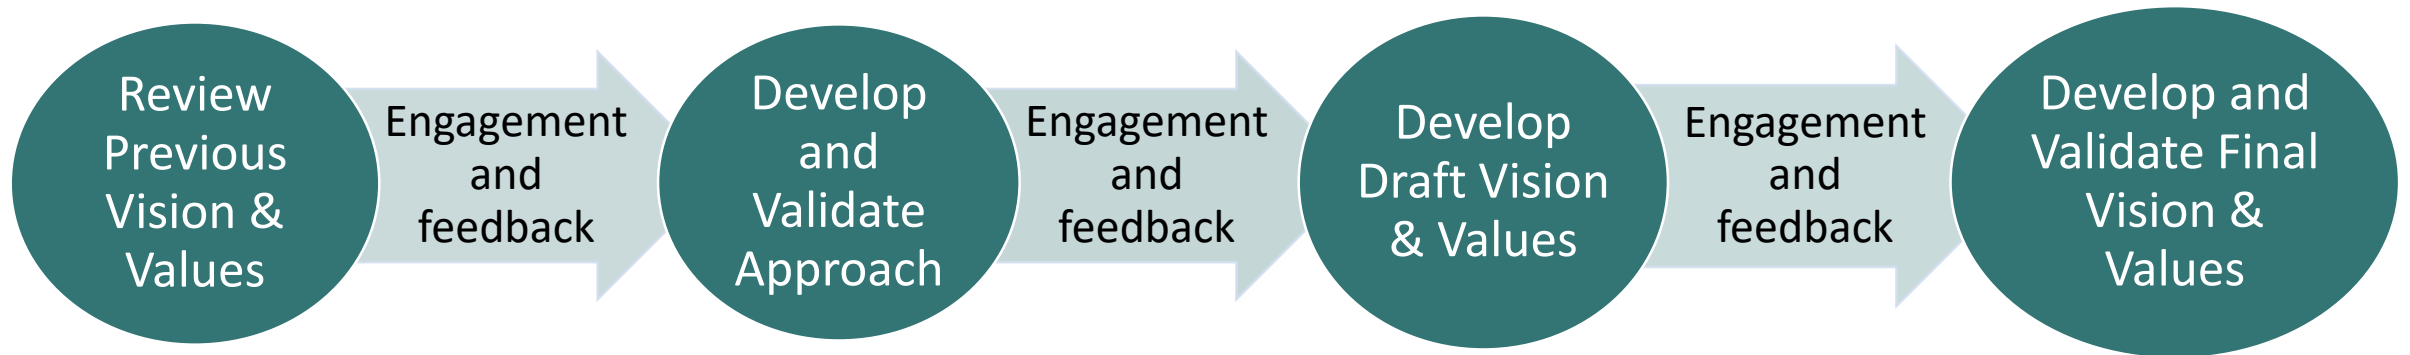

The purpose of a Vision and Values Statement is to identify specific regional values and goals that the program should consider as alternatives are being developed and evaluated

- Will be developed and validated in coordination with program partners, stakeholders and the public
- Articulates project goals
- Guides planning and design of the project
- Can be used to develop criteria and performance measures to evaluate alternatives
- Informs the selection and refinement of alternatives

# Steps to Develop IBRP Vision and Values

The following steps will be informed by feedback and guidance from bi-state legislative committees, advisory groups, and community engagement:

# Previous Vision and Values Development

- Draft Vision and Values Statement was informed by previous I-5 corridor planning studies, public input, and coordination with stakeholder groups and interagency partners
- CRC Task Force reviewed draft in the spring-summer 2005
- CRC Task Force adopted Vision and Values Statement in October 2005, with the understanding that it could be revisited

## Previously Adopted Vision Statement

*“ The Columbia River Crossing project will be developed through an inclusive and collaborative process that considers and gives weight to the work of the I-5 Trade and Transportation Partnership and delivers a financially feasible solution that sustains and stimulates a healthy community by addressing its mobility and transportation needs, increasing its business success and family prosperity, protecting its natural resources, and enhancing its quality of life. ”*

# Previously Identified Community Values

1. Community Livability and Human Resources

2. Mobility, Reliability, Accessibility, Congestion Reduction, and Efficiency

3. Modal Choice

4. Safety

5. Regional Economy/Freight Mobility

6. Stewardship of Natural Resources

7. Distribution of Benefits and Impacts

8. Cost Effectiveness and Financial Resources

9. Growth Management and Land Use

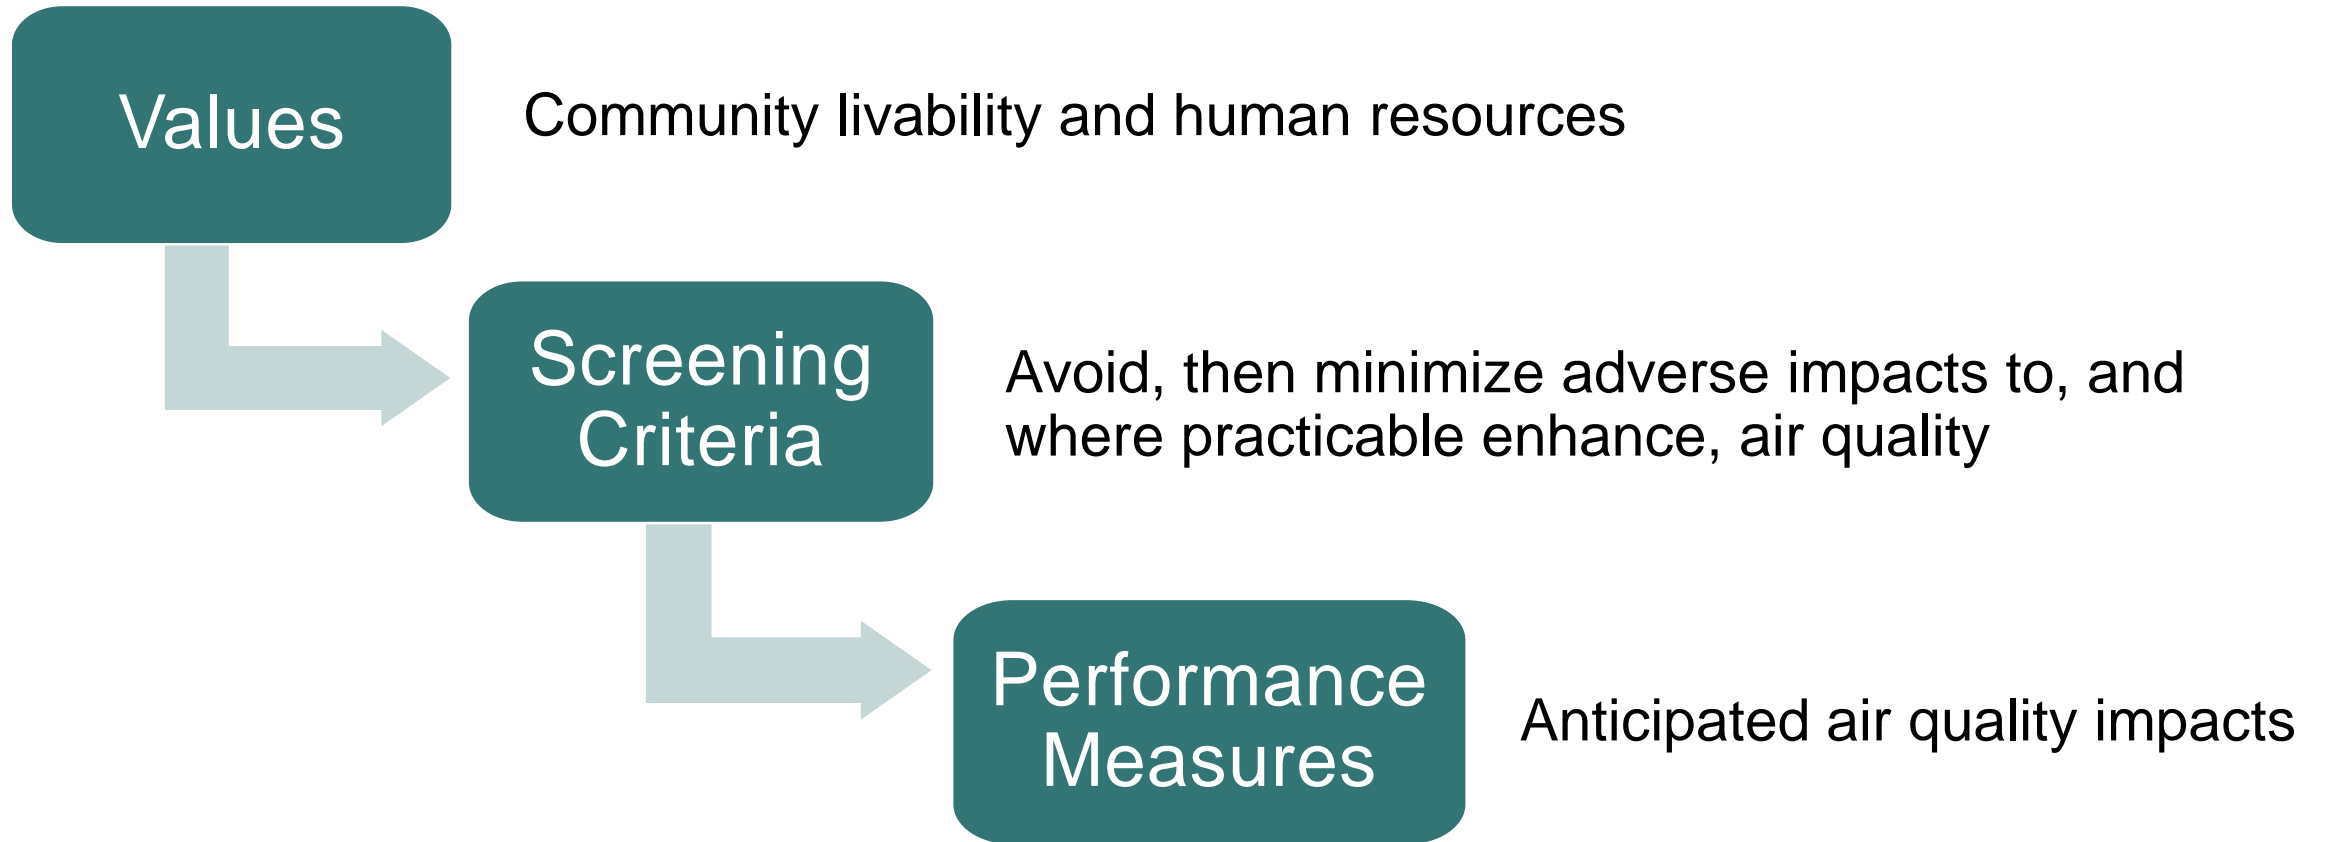

10. Constructability

# Example of Previous Process: Subcategories Defined for Identified Values

## Community Livability and Human Resources

- Supporting a healthy and vibrant land use mix of residential, commercial, industrial, recreational, cultural, and historic areas
- Supporting aesthetic quality that achieves a regional landmark
- Recognizing the history of the community surrounding the bridge influence area, supporting improved community cohesion, and avoiding neighborhood disruption
- Preserving parks, historic and cultural resources, and green spaces

# Example of Previous Process: Screening Alternatives Based on Values

# Bi-State Legislative Committee Engagement

Key questions to address as Vision and Values are developed and applied:

- What are the qualities desired from the project?
- Does the final draft Vision and Values reflect feedback received?
- Are performance measurements representative of the Vision and Values?
- Are the performance measurements applied in a representative way?

# Bi-State Legislative Committee Engagement

## Committee touchpoints and target dates:

- Review previous Vision and Values Statement and provide feedback on approach to develop new statement: *August 2020*
- Provide guidance/direction on draft Vision and Values Statement: *October 2020*
- Final Vision and Values Statement: *December 2020*
- Performance Measures: *March 2021*

# Discussion
