STOP Program Update

Effect of COVID-19 on Discretionary Stops

- COVID-19 reduced the number of discretionary traffic stops substantially during March, April, and May
 - Average daily stops before mid-March: 1,425
 - Average daily stops from mid-March to May 1st: 594
 - Many of the CJC's selected analyses rely on having sufficient sample size, which could be impacted by the reduction in stops.

Racial Breakdown of Arrests

Race/Ethnicity of Arrested Individuals (2010-2019) and 2019 Census Breakdown
