

Hello!

My name is Bridget Parker and I'm a resident of Portland, Or. I am also a registered nurse and very interested in the health of our state throughout this pandemic. I encourage you to pass HB 4208 regarding banning the use of tear gas and LRADs. Tear gas causes health problems under the best of circumstances, and is especially dangerous in aiding the spread of COVID19. LRADs can cause permanent hearing damage and physical harm if they are detonated close to people. The use of tear gas and LRADs by police in Oregon is unacceptable and I hope you pass this bill.

Thank you,

Bridget Parker
