

I'm not sure why it's legal to use internationally banned munitions on your own population, with I'm assuming no clear training in how to use them. For example they are not less lethal when you shoot a tear gas canister at someone's head. Torture has been shown in numerous studies NOT to work at stopping action. And as we see, Oregonians are outraged and motivated to come out in greater numbers.

We all want humane and safe communities. Stop making police the answer to social problems.
