

My name is Leslee Lucas and I live in Corvallis, Oregon. I am a retired health care worker, a septuagenarian, a mother, a grandmother, and I know that a well crafted universal health care system is the only way to bring our health care system in this country up to par with other wealthy first world countries. In our state it would:

Improve health outcomes for a majority of Oregonians

Reduce the overall price tag for health care in our state while improving access to adequate medical for many of us.

I thank you for your diligent efforts.

Leslee Lucas
