

Thank you for agreeing to work on this extremely important task to develop the system that will bring quality health care to all of us in Oregon. Hopefully this Task Force will find a way to remove the cost barriers to the provision of that care.

It is extremely important that all people have an opportunity to participate in establishing the system's goals that will affect their health. I look forward to following the Task Force's progress.

Good luck and thank you again for your commitment.

Rochelle Murphy
