

I was furloughed from my job on May 15. I applied for Pandemic Unemployment Assistance that day and have not received a single cent of benefits.

Every week I file. Every week I receive a letter saying "an issue is being resolved on your claim."

This is after being approved to receive benefits.

Every week I try to call for more information. Dozens, or even hundreds of times. I have never once been able to speak to a person to discuss what is wrong with my claim. I have no idea what the issue is to be resolved or what I can do.

It has now been 12 weeks of this, without any progress whatsoever.
