

How many representatives lost their jobs? How many did not get a paycheck? How many had to take out loans they will never be able to repay? How many have to claim bankruptcy? Lost their business? Have to figure out how to eat?

How many have actually been affected by Covid-19? Do any of them worry at night? Do any of them wonder what is going to happen to the thousands of tax paying American will continue to be robbed and injured because of unnecessary and unfounded claims of a virus that was rather a distraction from the corruption? How many are being held accountable for their reckless behaviors that have literally destroyed our communities... lost hope for the American people, and jeopardized the principles laid out in the Constitution. The spirit of protection of freedom and liberty. For what? Inaccurate medical data. Laziness? Greed.... what price and what costs until we find a balance of truth and justice, law and order that was meant to serve "We the People."

please excuse my grammar. I am tired. I know I need to practice proof reading my emails. I am working on this. I know it is not perfect but I hope the message is louder. The preservation of freedom and liberty.
