

I waited more than 18 weeks for unemployment insurance benefits, and went a total of over 21 weeks since losing my job February 20th, 2020; with no recordable source of income. I lived purely of credit cards and my stimulus check I received in April from the federal government.

I would like to be compensated for the interest charges on my credit cards.

This was unbelievably stressful for me and my family. I have two sons and a wife to support. For more information, please contact me at:
