

I am begging you to help us keep rental housing available to tenants. As the owner of 14 rental houses in Linn County, I am directly involved with this proposal and if the government continues to require landlords to shoulder the expense of providing reduced/forgiven rents to tenants but offers no assistance to landlords to offset our costs of business (and many times we as owners of rental properties operate on very LOW expense to income ratios) I am concerned that myself and owners like me will be faced with selling our properties rather than operate in the red. Rental housing is a business and if we continue to face financial hardships, the market will become even more scarce. Please address some other plan to take the burden off of the landlord - not all rentals are owned by large corporations that might be able to survive your proposal. Thank you for listening to my concerns. Respectfully Sherri Parker , Lebanon Oregon resident and Linn County voter
