Tru-Blu Protection PPE Surge Kit - For Emergency Management

NEED:

 Emergency Management planning has identified the need for strategically placed, pre-deployed PPE materials for emergency use.

•A PPE Surge Stock Kit has been developed which in effect is a PPE "Warehouse and Factory in-a-box".

•Each kit contains PPE for immediate use and allows for the production of additional PPE during a crisis.

•Each Kit will be identified by its light blue color and its contents are contained in a sealed steel box which is air / mobile transportable and can be stored longterm until its use is necessary.

KIT	CON	ITENTS:	
Description	Quan.	Description	Qua n.
Pre-cut covergowns - size Lge	10,000	12 0z oli & funnel	1
Finished Tru-Blu Gowns - Lge	1,000	5 gal gas can	1
N-95 Mask or equivalent 1000 pr Disposable Nitrile Gloves	1,000	40x48x80 metal crates	2
(2 cases of 1000 gloves)	2	Airlift strap assembly	1
Fabric Welder	1	Instruction Manual	1
2000W Generator	1	3-plug pigtail for extention cord	1
50' extention cord	2	LED work light (Craftsman #1107075)	1
30x72 folding tables	3	12' extention cord	1

PROPIETARY INFORMATION – FOR OFFICIAL USE ONLY – DO NOT DISTRIBUTE WITHOUT PERMISSION

Readying for deploymenteverything stacks and fits within the rugged, portable Surge Kit container; the Make Your Own to Protect Your Own ethos ready for action

PROPIETARY INFORMATION – FOR OFFICIAL USE ONLY – DO NOT DISTRIBUTE WITHOUT PERMISSION

Never forsaking safety or practical ease of use – metal rails inside kit crate guide and hold standard wood planks protecting materials and personnel from shift-intransit exposure

By trailer, truck, boat, rail, plane or helicopter, the Tru-Blu Surge Kit containers use rugged, standardized systems like this airlift hook to remain as adaptable as emergencies demand

PROPIETARY INFORMATION – FOR OFFICIAL USE ONLY – DO NOT DISTRIBUTE WITHOUT PERMISSION
