Post-Secondary Education Institutions

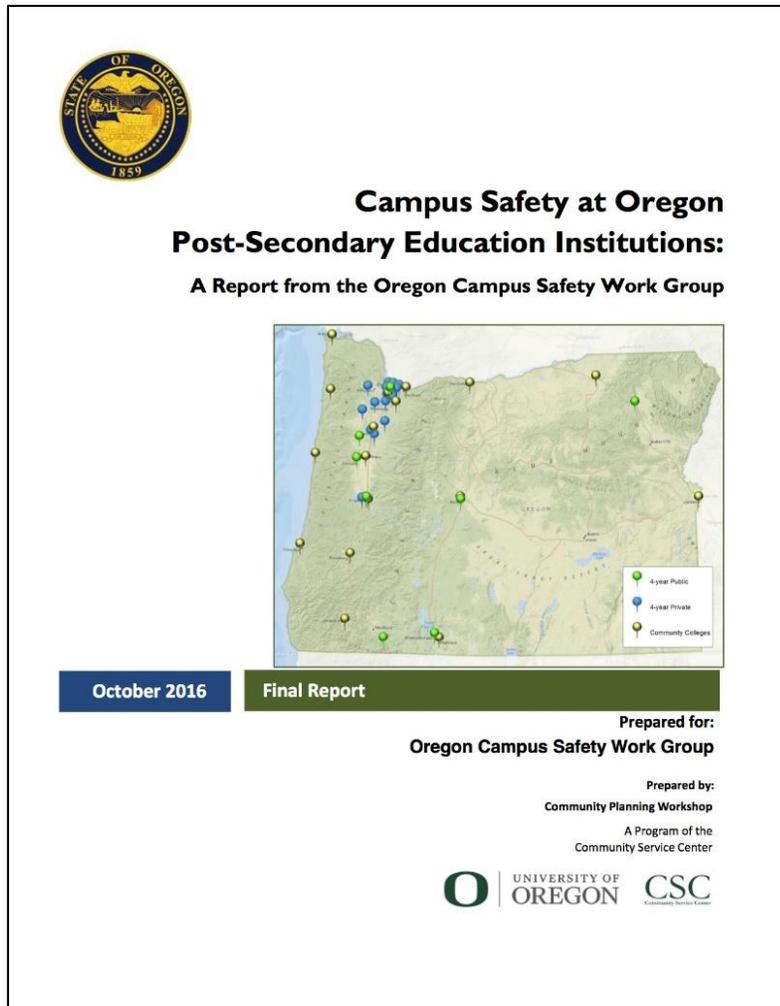

Locations, mission, connection to state economy

Post-secondary education fosters upward economic mobility for Oregonians, now and for future generations, be it in the basic sciences, applied research, data science, the social sciences or the skilled trades, higher education creates a ripple effect on the public good and the wellbeing of all Oregonians.

National Higher Education Emergency Management Programs Needs Assessment

611 responses from Higher Ed institutions in 45 states

- 64% are public institutions, 36% private
- 77% are residential campuses
- 53% have Ph.D. programs
- 22% have a University medical center

Does your institution's emergency management program have the following:

Type of Plan at Higher Education Institution	National <i>Have Plan</i>	Oregon <i>Have Plan</i>
Emergency Operations/Response Plan (EOP)	83 %	68 %
Hazard Identification and Risk Assessment	65 %	53 %
Crisis Communication Plan	64 %	63 %
Strategic Plan	53 %	41 %
Natural Hazard Mitigation Plan	50 %	47 %
Training and Exercising Plan	45 %	29 %
Business Continuity Plan - Administrative	36 %	32 %
Continuity of Operations Plan - Academic and Research	35 %	34 %
Recovery Plan	31 %	29 %

Recommendation 1.0:

Establish a Higher Education Safety and Resilience Council composed of university and college leaders and safety, security, emergency, and risk-management experts who will provide advice and recommendations to the Governor, state agency leaders, and the Higher Education Coordinating Commission on matters related to safety, security, and overall disaster resilience of Oregon's post-secondary education institutions (PSEI). The council will work with Oregon's post-secondary education institutions to strengthen the ability of Oregon's colleges and universities to prevent, protect against, mitigate, respond to, and recover from the threats and hazards that pose the greatest risk to the state's academic and research missions.

NOTES: There is a need for statewide coordination, training standards, resource allocation, and more to improve campus safety and resilience at all post-secondary education institutions in Oregon. The first recommendation is to establish a council that advises on needs, tracks changes, and provides resource recommendations to the Governor's office, the legislature, and the Higher Education Coordinating Commission to advance campus safety and resilience initiatives statewide.

January 2019: Establishing the Oregon
Campus Resilience Consortium (OCRC)

RECOMMENDATIONS

2.1 Establish a statewide, standardized, shared-services training program for PSEI for incident response, continuity, and recovery.

2.2 Develop and support all-hazard incident management teams to serve PSEI. The teams would consist of both campus and regional teams to cover all PSEI in the state.

2.3 Support the adoption of the National Intercollegiate Mutual-Aid Agreement by all Oregon PSEI.

2.4 Develop statewide training and resources for higher education academic, research, and administrative continuity.

2.5 Create training and outreach materials for preparedness and mitigation to benefit all PSEI staff, faculty, and students, as well as community partners.

2.6 Establish online resource-sharing and collaboration center for higher education practitioners charged with maintaining campus safety and disaster resilience.

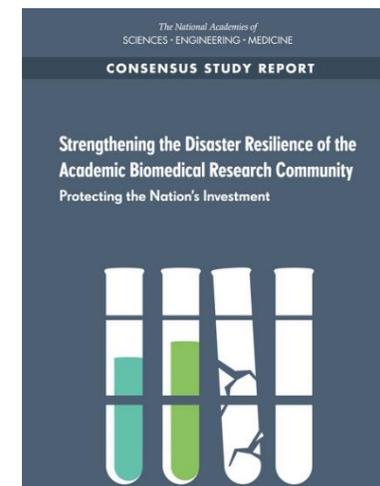

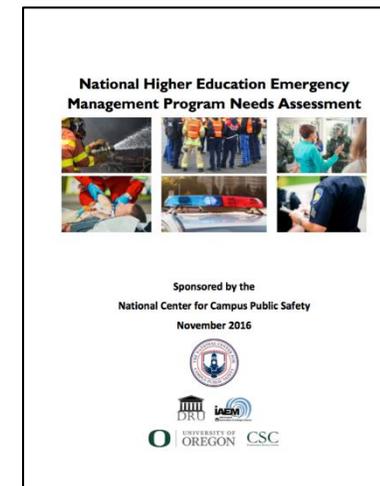

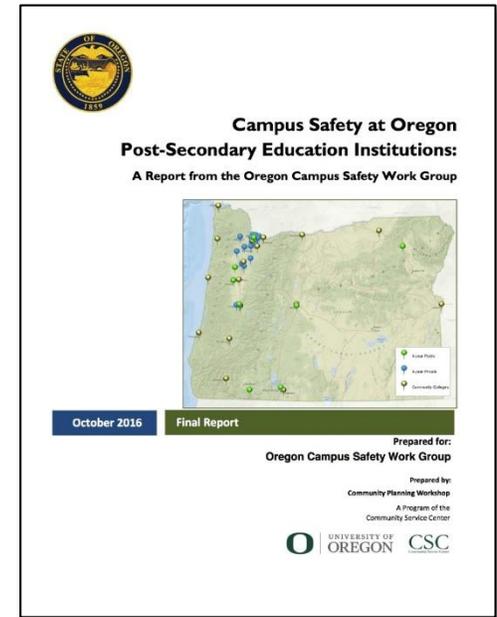

Campus Resilience Consortium

Next Steps:

- Finalize the OCRC charter.
- Establish a statewide shared services training program focused on methods for colleges and universities emergency management, continuity (e.g., **academic and research**) and recovery programs to strengthen Oregon's colleges and universities.
- Link the skills, expertise, resources, and innovation of higher education with state and federal agencies and professional and trade organizations.

Campus Resilience Consortium Next Steps:

- OCRC member institutions will continue to link, align, and leverage existing resources to advance campus safety and resilience for all higher education institutions in Oregon.
- OCRC is seeking \$1 million in seed funding to get the Consortium off the ground as a first step to addressing this critical need. This request is in line with the recommendations of the 2016 Governor's Campus Safety Work Group.
