

I vehemently oppose SB 526 as it is written and *especially* as intended to be amended from a study to actual implementation.

For the following reasons:

- There is already a home visit program for those who want it.
- With all the current problems/corruption within DHS not only can they not be trusted, but I really questions how we can even think of adding another program to an already struggling organization.
- Oregonians don't want or need further government overreach into their homes.
- This is a waste of taxpayer money.

Respectfully,  
Jana Foo
