

I see you will be having a work session on HB 2022. I entered Testimony for the public hearing and would like to add a clarification on the generality of the name "Oregon Online", when I mentioned this to a school board member, he smirked and stated the name could be taken for anything, even online gambling!

If the name is going to distinguish that it is not reflective of a school district, then it at least mentions that it is a school online program.

I suggest that "Oregon Online School" might be appropriate.

Thank you for your consideration during the work session.
