

No to HB 2020. Waste of money. CO2 is not a pollutant, it is a free airborne fertilizer and less than 1/2 of 1% of the atmosphere. The climate cult is all about scare tactics, pushing failed 'models' as proof of global warming/ climate change/climate disruption. The climate will always be changing.

It

is not stagnant. UN officials have admitted the climate policy they push is not about the climate at all, it is about wealth redistribution. Do not vote for this ridiculous waste of a bill.
