

To the Senate Committee On Health Care,

I'm writing to ask your support for SB 452.

This bill Directs the Oregon Health Authority to develop triage, treatment and transportation protocols for patients who carry emergency use medications. Allows emergency medical services provider to administer to patient emergency use medication carried by patient.

My son has an emergency medication that he and I both carry at all times. In times of emergency child needs this medication. It not only can save my child's life, but prevents further harm.

Without timely administration of his Solu-Cortef injection in the case of an emergency he could die in as little as thirty minutes.

Please help my son and all Oregonians by voting yes on SB 452
