

- Do NOT take away local control of neighborhood zoning.
- HB2001 is a scam by the Developers' Lobby to build cheap, shed-roof multifamily dwellings that will deteriorate then lower property values and decrease taxes.
- Kotek is more concerned with what developers can do for her than what she should be doing on statewide issues for Oregon.
- Permitting multifamily dwellings in every Oregon neighborhood will destroy neighborhood character.
- This bill does absolutely nothing to address low income housing because if anything, this will drive up housing costs.
- This bill denies our rights as a citizen to live in a single-family neighborhood.
- The state must not deny local land use control; leave control to the people who live there and pay the taxes to support their neighborhoods.

Thank you.
