

Dear Committee Person,

I am requesting the hearing on HB2001 February 11 2019 be postponed until weather permits my attending and giving my testimony.

I am opposed to this bill and feel I have been left out of the planning.
You see I am paralyzed from the chest down and use a wheelchair to get around my neighborhood.

Ive watched my neighborhood become developed at an alarming rate . While some of the Development has been good most has had a negative impact. There are no affordable units being built. There are no ADA accessible units being built.

As a person who uses a wheelchair I am dependent on a car parked in front of my house. The proposed rezoning for Development does not include where parking would be and just leaves it out.
What this means for me is I am likely not going to have access to my car.

I do not see that this will produce anything that would benefit the most vulnerable in my neighborhood. Elderly, disabled and houseless individuals are not having a seat at the table here. We pay taxes and deserve better.

Please postpone this hearing until all can attend

Thank You,

Kelly Tadlock
