

To the Senate Committee On Health Care,

I'm writing to ask your support for SB 452.

This bill Directs the

Oregon Health Authority to develop triage, treatment and transportation protocols for patients who carry emergency use medications. Allows emergency medical services provider to administer to patient emergency use medication carried by patient.

My child has an emergency medication he carries at all times. In times of emergency, my child needs this medication. It not only can save my child's life but prevents further harm.

Emergencies are scary in and of themselves, thinking that emergency personnel could not administer the life-saving medication that my son has with him but would not be able to administer himself makes everything even scarier!

Please help me, my child and all Oregonians by voting yes on SB 452

Samantha Horn, Junction City OR.
