

My name is Laura Adams, I reside in Sherwood, Oregon.

I fully support SB 649.

Over the last year, I have been making much better decisions when it comes to my health. I am fully informed as to what I eat and what medications I take. Every patient who gets a prescription drug from the pharmacy gets a print out on the information about the medicine. Vaccines are no different. As a patient and mother, I think it is imperative that doctors hand a packet out to their patients as this is a medical procedure. This will ensure Oregonians are able to make an informed decision alongside their doctor.

I support SB 649 and informed consent.
